Proposal

Base Case Anarchy

Theme: Comic, Light and Twist

How it begins:

Our game begins in future where almost everyone is trapped in the rat race. Working, dying nothing else matters in the world. Our main character soon realises how he is stuck in the world and cannot grow into something bigger. System soon finds out how he is changing, so obviously they had to act on him. They came for him but his family tried to protect him and he somehow finds himself in the dark. A light calling out his name with the voice of his mother, he follows the light through the darkness finding a way out. As he moves along his journey he learns about what happened to the world and why is the world in this state. He thinks that he will soon escape out of this prison and change the world for good, just like... everyone does. Atleast thats what he thought. He soon reaches somewhere familiar, something he tried to escape. He finds out that the light he was following was just leading him again to the world he was rejecting (this is where the twist comes) and that he can never escape what is already decided for him.

Art Style:

This game features comic art style which makes the game look fast-paced and more engaging.

Game progression:

As the light guides us through the darkness, we solve puzzles to progress through the darkness and move on along our journey.

Ending:

We shaped the game for it to leave an impact at the hearts of the people playing it. So that they remember what the game was and not forget them like any other game they played.

Base:

Game is expected to be a 2D platformer/maze based game showcasing puzzles and storytelling.
